

PT Sukses Terus Project Plan

Using Scrum

Case Study: PT Sukses Terus - A Digital Solution for Employee Healthy Lifestyles

Problem Statement

Over the past few months, employees at PT Sukses Terus have experienced a decline in physical fitness and work energy. The main complaints are:

- **Fatigue** during working hours
- **Physical inactivity** due to spending the entire day in front of a screen
- **Declining motivation**

The HR Department requires a simple digital solution to promote a healthier lifestyle among employees through physical habits, dietary patterns, light activities, and peer support.

Product Name: SehatKerja

"A simple web/mobile application that helps employees build healthy daily habits in the workplace."

1. Product Goal

"To help PT Sukses Terus employees build healthy daily habits in the workplace through reminders, light activities, healthy eating, and peer support, thereby increasing employee energy levels within three months."

Success indicators:

- At least 60% of employees actively use the application every week
- The average daily employee energy score increases by 20% compared with the first month
- At least 40% of employees participate in team challenges

This Product Goal directly addresses the three problems identified in the case: **fatigue** (energy), **physical inactivity** (light activities), and **declining motivation** (social support).

2. Product Backlog

ID	User Story	Impact / Priority	Effort	SP	Sprint
PB-01	As an employee,I want to have a simple profile linked to employees' office accounts so that the application can be used immediately and effortlessly.	High	Easy	5	Sprint 1
PB-02	As an employee, I want water-intake reminders so that I stay hydrated and feel less fatigued.	High	Easy	2	Sprint 1
PB-03	As an employee, I want a break reminder every 60 minutes so that I do not spend the entire day sitting in front of a screen.	High	Easy	3	Sprint 1
PB-04	As an employee, I want 2-5 minute desk-stretching guides so that my body does not become stiff.	High	Easy	3	Sprint 1
PB-05	As an employee, I want a one-click daily energy check-in so that I become more aware of my physical condition.	High	Easy	3	Sprint 1
PB-06	As an employee, I want to see my healthy-habit streak so that I stay motivated to remain consistent.	Medium	Easy	3	Sprint 1
PB-07	As an employee, I want to join weekly team challenges (e.g., walking or taking the stairs) so that I feel more motivated to stay active with my colleagues.	High	Needs prep	8	Sprint 2
PB-08	As an employee, I want to see an inter-team leaderboard so that the challenges feel more engaging.	Medium	Medium	3	Sprint 2
PB-09	As the HR team, we want an energy-trend feature with an aggregated employee participation dashboard so that we can address issues more quickly.	High	Needs prep	5	Sprint 2
PB-10	As an employee, I want healthy meal recommendations from the office canteen or nearby vendors so that I can improve my eating habits.	Medium	Needs prep	5	Sprint 2

PB-11	As an employee, I want to invite colleagues for afternoon walks or healthy lunches so that I have companions to help me stay consistent.	Medium	Medium	5	Sprint 3
PB-12	As HR, I want to create and announce wellness events (e.g., morning exercise sessions, webinars) so that employees can participate easily.	Medium	Medium	3	Sprint 3
PB-13	As an employee, I want to earn points that can be redeemed for rewards so that I have a long-term incentive.	Low	Needs prep	5	Sprint 3
PB-14	As an employee, I want to connect my smartwatch or health app so that my activities are recorded automatically.	Low	Hard	8	Sprint 3

Definition of Done

No.	Definition of Done	Status
1	Code has been completed and reviewed	
2	Feature has been tested	
3	No critical bugs remain	
4	Acceptance criteria have been met	
5	Reviewed and accepted by the Product Owner	
6	Technical documentation and user guide have been updated	

3. Sprint Plan

Assumption: each sprint lasts two weeks, with a team capacity of approximately 20 story points per sprint.

Sprint 1 - High Impact + Easy to Do

Total story points: 19 SP | **Backlog items:** PB-01, PB-02, PB-03, PB-04, PB-05, PB-06

Sprint Goal

“Employees can use the application to practice basic healthy habits at their desks and record their daily energy levels.”

Rationale: This sprint directly addresses the complaints of fatigue and physical inactivity with the simplest features. By the end of the sprint, the application will be usable, and energy check-in data will begin to be collected for use in Sprint 2.

Sprint 2 - Medium Impact / Needs Preparation

Total story points: 21 SP | **Backlog items:** PB-07, PB-08, PB-09, PB-10

Sprint Goal

“Employees are motivated to stay active together through team challenges, and HR can monitor employee wellness trends.”

Rationale: These features require preparation (challenge rules, canteen menu data, dashboard design), and the HR dashboard only becomes meaningful once data from Sprint 1 is available. This sprint addresses declining motivation and dietary habits.

Sprint 3 - Low Impact / Long-Term

Total story points: 21 SP | **Backlog items:** PB-11, PB-12, PB-13, PB-14

Sprint Goal

“Employees’ healthy habits become sustainable through social support, shared events, and a reward system.”

Rationale: These features strengthen long-term engagement but require budget (rewards) or technical integration (smartwatches). Their priority may be adjusted based on feedback from Sprint Reviews 1 and 2.

Sprint Summary

Sprint	Sprint Goal	Problem Focus	SP
Sprint 1	Basic desk-based healthy habits + energy check-in	Fatigue, physical inactivity	19
Sprint 2	Team challenges + HR monitoring + healthy menus	Motivation, dietary habits	21
Sprint 3	Social support, events, and rewards	Sustainability	21

Link to the Product Goal: Sprint 1 builds individual habits, Sprint 2 adds collective motivation and monitoring, and Sprint 3 ensures these habits are sustained. Each sprint is a step toward the Product Goal and delivers a usable increment.
